

Our Services at a Glance

**Environmental Technologies & Plant Engineering
Solutions for a Sustainable Future . . .**

Bremer pro aqua Wasser- und Abwassertechnik offers experience in a wide range of environmental engineering for both industrial and municipal applications. New-building, restoration or upgrades of existing systems – Our competent team of experts are well versed in individual plant engineering using state of the art - environmental technologies.

RANGE OF SERVICES I

Anaerobic Wastewater Treatment

- UASB Reactor Technology
- HPA-EGSB Reactor Technology

Industrial Wastewater Treatment

- Sequencing Batch Reactor Technology
- Membrane Bio Reactor Technology
- Dissolved Air Flotation

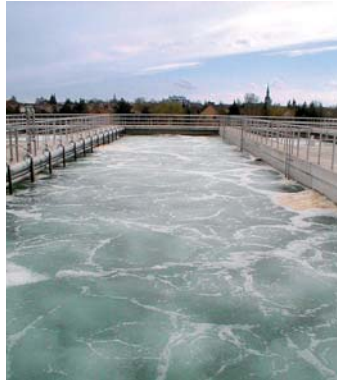

Industrial Processwater Treatment

- Softener
- Ion Exchanger
- Filtration Units
- Reverse Osmosis Plants
- Dosing- and Neutralization Stations
- Oil-Separation
- Heat Exchanger
- Activated Carbon Filters
- CIP-Units

Biogas Plants

- Biological Process Engineering
- Feeding- and Conveying Systems
- Combined Heat and Power Plants
- Gas-Processing
- Exhaust-Air Treatment Units

RANGE OF SERVICES II

Municipal Wastewater Treatment

- Sewage Treatment Plant Construction
- Upgrade of Existing Plants
- Aeration Systems
- Agitators and Mixing Devices
- Micro-Element Removal
- Co-Fermentation
- Pump Technology

Sludge Treatment

- Filter Belt Press
- Decanters
- Chamber Filter Press
- Polymer-Stations

Drinking Water Treatment

- Water Works New-build, Restoration a. Upgrade
- Disinfection Units
- Swimming Pool Technique

Special Plants and Services

- Media-Supply-Systems
- Pipe- and Hydraulic Engineering
- Materials Handling Technology
- Quenching Water
- Restoration
- Process Measuring and Control Engineering
- Pilot-Plants
- Upgrades
- Service & Maintenance
- Special Constructions

LIST OF OUR SERVICES

Proposal, Design, Assembly, Installation, Operation, Restoration, Upgrading and Service for environmental technologies in the following areas:

-  Anaerobic Wastewater Treatment
-  Industrial Wastewater Treatment
-  Industrial Processwater Treatment
-  Biogas Plants
-  Municipal Wastewater Treatment
-  Sludge Treatment
-  Drinking Water Treatment
-  Special Plants & Services

ABOUT US

Founded in 1989, we are a team of 45 employees handling different projects in various environmental engineering fields. Our focus is functionality, economical efficiency and operability. We consult and support you during your conceptualization, and propose the optimal process and systems-equipment. Thus, we have the ability to construct high-quality plants to suit our customer needs.

For every single employee flexibility is a virtue. This is highlighted by the interdisciplinary knowledge of our team. Our quality guarantees is ensured in our own onsite factory where we construct pipes, form moulded parts and tanks in different materials like steel, stainless steel, and different plastics like polyethylene. With our many years of experience, our contacts to competent and trusted suppliers, we choose the best available and most economical technique for your process.

**Are you interested in further and detailed information about our services?
Do you have an active project and would you like to get an offer?
Please contact us! We are pleased to support you in your projects.**
