

Project: Tank Wagon WWTP Lormافر
Location: Lormافر, France
Commissioning: June 2011

Scope of Supply:

In Lormافر, France tank wagons are getting serviced and repaired. As a preparation step the tanks are getting drained and cleaned. Bremer pro aqua has supplied a unique and specific wastewater treatment plant.

On a washing plate the produced wastewater is getting collected and pre-treated by activated carbon. Gases from the tanks containing fuel or similar are sucked out of the tanks and treated. The further wastewater treatment consisting of oil/water separator, dissolved air flotation (DAF) and aeration is installed in 40'-maritime container

Technical Data:

Size of Washing Plate: 500m²
 Exhaust-Air-Treatment: Activated Carbon
 Capacity WWTP: 21m³/d
